

MYOB[®] BankLink

The easy way to manage your Super Fund

BankLink helps make your life easier by simplifying the management of your Super Fund. We ensure your accountant can work more effectively and help you meet your trustee responsibilities and complex compliance requirements.

Saving you time, stress and effort

BankLink will save you time and remove the stress associated with the administration of your Super Fund, such as the management of contribution caps.

By using our service and software, your accountant will receive your Super Fund transaction information straight from your preferred financial institution, in the most secure, accurate and reliable way, ensuring no manual data entry is needed.

With BankLink your records are always complete, accurate and up-to-date.

How does BankLink work?

Banks and financial institutions record transactions made by your Super Fund.

BankLink collects transaction data from over 120 financial institutions, including banks, credit cards, credit unions, brokers and fund managers.

BankLink provides your accountant with an electronic copy of all your transactions.

BankLink enables your accountant to better manage your Super Fund administration.
