# BankLink can make SMSF account processing less painful

BankLink offers accounting practices like yours a faster, easier and more efficient way of processing SMSFs. You can add value to clients, help manage the strict compliance requirements and grow your SMSF client base.

**The BankLink Service** lets you:

- Increase your productivity – letting you manage more clients
- Receive complete, timely and accurate client transaction data
- Eliminate the inaccuracies of data entry
- Easily monitor and manage contribution caps

## How it works

At the touch of a button you can download all of your clients' transaction information from Banks, Fund Managers, Wrap Platforms, Building Societies and Credit Unions.

Transaction information is available when you need it (daily, weekly or monthly) and is completely accurate and secure. BankLink has achieved PCI DSS (Payment Card Industry Data Security Standard) compliancy – a security standard set by major financial institutions.

Memorisations can also be set up to improve efficiency, with regular transactions being able to be automatically coded to reduce processing times.

## Seamless integration with your SMSF software

**BankLink Practice** integrates seamlessly with all major SMSF software including:

- APS Desktop Super
- BGL Simple Fund
- Class Super
- IRESS Xplan
- Praemium
- Sage HandiSoft SuperFund
- Supercorp Superfund
- Supercorp Supervisor II
- superMate

It's little wonder why thousands of practices across Australia use The BankLink Service to automate and effectively manage processing their SMSF clients.
